A NEW LOCALITY FOR YPONOMFUTA IRRORELLA (HBN.) IN KENT. — At the meeting of Kent lepidopterists at Maidstone Museum on March 22nd this year, I took along a selection of micros I had not identified, and among them the Editor confirmed that I had two specimens of *Y. irrorella* from a locality hitherto unknown for this very local species. I had beaten them from a hedgerow above the Old Chalk Pit between Burham and Wouldham (TQ 72/63) on June 21st 1976. — ALFRED J. BUTCHER, 28, The Fairway, Rochester, Kent.
